

Project Log

<u>Date</u>	<u>Comment</u>
10/03/08	I began my project plan and created a project log.
13/03/08	Fill in the plan
17/03/08	I continued work on my plan
20/03/08	I continued work on my plan
24/03/08	I filled in the 'main tasks' abs 'sub-tasks' section of my plan.
27/03/08	I filled in the 'Main Tasks' abs 'Sub-Tasks' section of my plan and started adding 'Times.'
31/03/08	I have finished creating my plan, by adding all of the times, adding comments, a review, and my checkpoint. It went well because I managed to complete it on time. It went wrong because I got slightly confused at times, but I managed to work them out.
21/04/08	I created a database structure.
08/04/08	I worked on my Database form.
12/04/08	I completed my Database form.
15/04/08	Today, I added more records to my form and turned my form into a PDF file.
02/06/08	I began to work on my Danceometer
05/06/08	I continued to work on my Danceometer, formatting by changing colours of fonts and backgrounds, changing front sizes and font faces.
09/06/08	I began to start researching five different charities.
16/06/08	I created a plan for my sponsor form. The reason I did this early is because my teacher was absent from the lesson. My test buddy thinks that my sponsor form is colourful, colour co-ordinated and neat.
19/06/08	I Today, I added some drop down menus to my Danceometer.
23/06/08	Today I added some IF formulae to my Danceometer. My test buddy thinks I did my IF formula well once I had sorted out a couple of problems I had.
26/06/08	I added another IF formula to my Danceometer which determines peoples fitness levels. My test buddy thinks I did this very well.
30/06/08	I added another section to the Danceometer and added one other drop down menu.
07/07/08	I worked more on my Danceometer to make sure everything was running correctly.
05/09/08	I have created a sources table which I didn't before. I have spent a whole lesson sorting it out and I am now going to keep it updated. Next I am going to create some invitations, as this is my next sub task. I worked well today and understood what we were doing.
09/09/08	Today, I started to create my invitations. Charlie made a comment on my work and he said, 'It is pretty good so far' Jake said 'I like the font' Katy said ' the font isn't the same the two textboxes are different,'
12/09/08	Today, I did some more work on my invitation, we peer evaluated each others work. Here is some of the comments of what Georgi said about my work, "The language is quite formal, however there is a few spelling mistakes" which I realised and changed. "The colour scheme is suitable for both boys and girls; maybe there could be some different fonts to make it stand out more. Try to use more persuasive language.'
16/09/08	Today, quite a few people made me take some

	<p>pictures for their invitations using my camera phone. This took most of the lesson so I didn't do much.</p>
18/09/08	<p>I have completed my invitations and now I have to update my sources table, project plans and my review.</p>
23/09/08	<p>Today I Updated My Danceometer, I Updated My Sources Table.</p>
26/09/08	<p>Today I completed my Danceometer. I haven't yet filled in my review or project plan, but I will try and find some time on another lesson. I think I worked quite well today and I am satisfied with the work on my Danceometer.</p>
02/10/08	<p>Today I added more added more validation rules, as I looked at the Dida website more carefully and checked it.</p>
03/10/08	<p>Today I took screen shots of my work so I have proof for the exam.</p>
7/10/08	
14/10/08	<p>Today I began to work on the section 'Make A Catch.' I started by creating a master slide and are now continuing with my power point presentation. Using Microsoft PowerPoint.</p>
16/10/08	<p>Today I searched for suitable animations to put onto my power point. I had some feedback from my teacher and she said</p>
17/10/08	<p>Today I added effects to my power point; I have tried to add suitable pictures and animations for my target audience. I have stayed focused in this lesson, but and a group of friends and I had a discussion about how we say different words, 'help the aged' 'scone.' I think I need another lesson to complete my 'Make a catch' power point. My next task will be to complete it.</p>
21/10/08	<p>Today I tried to complete my make a catch PowerPoint, I set my slide show to it loops continuously I will add timings to my presentation so the audience has time to read what I have write and so I don't have to be stood at the front clicking the mouse and re-starting the PowerPoint. I put more information about my charities. The next thing I will do is get feedback from my peers and then update the presentation accordingly; I will also check my review. Then I will look at my plan and update it.</p>
24/10/08	<p>In this lesson I got some feedback, from my partner. 'You need to create timings for the PowerPoint then you don't have to click the mouse. Also you have suitable images that make the PowerPoint more appealing to your target audience. Good information about your charities. If you finished your presentation it would be much better. If you ended the PowerPoint with some persuasive text more people would want to come! I like your colours schemes, throughout and the effects were groovy.' I agree with Holly's comments and I will finish my presentation and add some timing and add some persuasive language.</p>
	<p>At the start of the lesson I opened up my action plan and saw that my next task was to go back and create a play list/ o created a query and searched for Rock and Pop Medium. This play list is for me. I deleted some tracks to make sure my play list consists of songs that make up no longer than 900 seconds. My play list is . I edited the</p>

	report to make it more appropriate because I didn't like the font or the layout.
06/11/08	In today's lesson I finished my Play list to do this I added two suitable images and changed my background colour to black. This links in with my black and red theme. Katy thinks my play list is 'I like it, the colours are good. But personally I would only have one image' I acted on this and changed m 2 images to 1 In today's I completed all my tasks required! I think I worked on task throughout the lesson. In my next lesson I am going to get some feedback from my classmates!
07/11/08	Today, we looked at each others work and gave feedback to each other. My partner was Holly! Holly said 'You could Make your play list more colourful, maybe add a different text colour, brighter colours. You have a sensible heading, the name of dancer the chosen charity and time slot is clearly wrote, you have an appropriate you have one suitable image which could be a little bigger but it does fit in with the theme. You have a good use of space and your text is aligned well done!' I haven't changed the colours on my play list as the colours fit in with my theme red and black. I would like to change the colours but this would mean changing my whole theme.
14/11/08	In today's lesson I have created a query for my test buddy. I have then created a report using the information from query; I published the report into Microsoft word. In order for this to be a working play list the songs have to be no longer (when added up) than 900 seconds. I changed the background to the play list to make it more suitable for my target audience and also so it will fit in with my red and black theme. In next lesson I will carry on with this and then I will need to update my review.
18/11/08	Today we only had half a lesson as the computers were down and the IT technician needed to do something to the computers which involved switching off the power. So for the remainder of this lesson i played on the interactive white board as Miss. Patel said I could! ☺
20/11/08	There was an exam in our Dida room so therefore we had to go into a classroom. In the classroom we completed a test about ICT and I got 32 out of 40.☺
21/11/08	In today's lesson I completed my test buddy's play list, however I have stumbles across some problems. For some reason the text boxes wouldn't move, and eventually when I did move it the whole play list moved so it took me a while. In the end I had to ask my friend Katy to help me as I couldn't do it. She figured out that it was a really simple mistake, that I had the alignment of justify she told me what I needed to do and I changed it.
25/11/08	In today's lesson I have updated me sources table and updated my review. However I didn't understand what to write but miss told me what I needed to do. I have looked at my action plan and I have realised all I need to do is a sponsor form, so in my next lesson I am going to complete my sponsor form in one lesson.
02/12/08	In today's lesson I have started my sponsor form. Next lesson I need to complete my sponsor form and get some feed back.
04/12/08	In today's lesson my teacher was absent. I did, however, fully complete my sponsor form.
05/12/08	Today I have used my checklist to go through

	<p>and check that I have done everything. I spent most of the lesson filling in my Danceometer for myself and my test buddy. I think I will spend one more lesson checking my work. I looked through my plan and I realised that my next task is to start my e-portfolio. I have worked quite well this lesson. My teacher told me that I needed to make some edits to my plan concerning the checkpoints. I started on this but I didn't get time to finish this. My test buddy made some comments on my sponsor form she said that she liked my sponsor form because it was simple and she liked the colours chosen and that they were well co-ordinated. She also said that I could add a picture or make it slightly more eye catching. I have decided I shall add a picture because it is something that my sponsor form would need.</p>
09/01/09	<p>I have created links for my keywords, I have created additional pages. I have managed my site, and checked for broken links. Next lesson I am going to make a style sheet. In today's lesson I have worked well and finished all the work set for today.</p>
13/01/09	<p>In today's lesson I have created a style sheet, I found this easy to do as we went through it step by step. I prefer doing this instead of wasting my time in changing fonts and colours for each page. This enabled my pages to be consistent. I have now attached my style sheet to each one of my pages and changed a white colour of my text when hovered over it changed colour, I changed this to a black as it fitted with my theme of black and red.</p>
15/01/09	<p>In today's lesson I have written comments introducing my evidence. I think I have worked well today and I have nearly finished my comments.</p>
16/01/09	<p>In today's I have almost finished my commentaries to introduce my evidence. Next lesson I need to start PDF'ing my work and attaching it to the appropriate pages. I have worked well in today lesson but I think I need to type faster, as I am writing lots on my e-portfolio but it is taking me a while</p>
20/01/09	<p>In today's lesson I was PDFing my work, I found this easy to do. However, the computers were being strange and some of the colour was fading. I worked well in today's lesson I enjoyed It.</p>
26/01/09	<p>In today's lesson I PDF'd some more of my work, however I haven't finished this in next lesson I will do that. I haven't worked that well in this lesson and I was laughing with Katy Ellis.</p>
29/01/09	<p>In today's lesson I have worked on completing my project plan. This took all lesson as I haven't been keeping it up-to-date. Yet again Katy Ellis helped me do this.</p>
30/01/09	<p>In today's lesson I worked on completing my e-portfolio.</p>
06/02/09	<p>In today's lesson I added a copyright statement to my research page because I am still waiting for a reply from some of the companies whose info I have used. I have explained on my music database e-portfolio page why I have used Prop-downs on my form. I have created a screen shot of my Danceometer and I annotated my work.</p>
10/02/09	<p>In today's lesson I concentrated on completing my sources table and I PDF'd it in my e-portfolio</p>
12/02/09	<p>In today's lesson I PDF my search criteria, completed my sources table, I could have worked better but my computer crashed twice!</p>

13/02/09	I spent today's lesson completing all my work for this project.
